ENGINEERING EXCELLENCE SINCE 1940

ALEXCO aluminium profiles, made to suit the job

ALEXCO is a New Zealand aluminium extrusion specialist based in Miramar, Wellington. The catalogue brings together standard profile shapes that can be run, finished and supplied for a wide range of applications.

Rather than limiting customers to a shelf-only approach, ALEXCO is set up to run profiles to order and support the details around each job, including cut length, finish, packing and delivery requirements.

Run to order

Profiles can be produced for the job, with quantity, timing and finish requirements confirmed at quotation stage.

Cut to your length

Nominate the length required. Multiple cut lengths can be arranged where practical.

Powder coated

Profiles can be supplied in powder coated finishes, including standard and custom colours by arrangement.

Anodised

Anodised options are available for suitable aluminium profiles and applications.

ONE SITE, ONE TEAM

From profile requirement to finished extrusion

ALEXCO is built around an end-to-end production model. Design support, die work, extrusion, finishing, fabrication and packing can be coordinated through one team.

01

Select a catalogue profile or ask about a similar custom shape.

02

Confirm alloy, temper, quantity, cut length, finish and delivery timing.

03

ALEXCO checks manufacturability and confirms the production approach.

04

Profiles are extruded, cut, finished and fabricated as required.

05

Orders are packed and supplied for pickup, freight or delivery by arrangement.

Final manufacturing details should be confirmed before ordering, especially for tight tolerances, critical cut lengths, finish requirements or unusual applications.

RUN-TO-ORDER GUIDANCE

Built around practical production runs

ALEXCO standard profiles are generally run to order. Typical minimum production runs are around 100 to 150 kg per profile, depending on the section, alloy, finish and production requirements.

Smaller runs are possible by arrangement. Where an order is below the typical run quantity, an additional setup and shipping charge of around NZ\$600 to NZ\$800 may apply.

Typical run size

Allow around 100 to 150 kg per profile as a practical guide for standard run-to-order production.

Smaller runs

Smaller quantities can be quoted, but may attract an additional setup and shipping charge.

Indicative charge

For orders below typical run quantity, allow around NZ\$600 to NZ\$800 extra, subject to confirmation.

Catalogue pricing basis

Indicative prices are based on a typical 200 kg mill finish order, standard packaging and delivery within New Zealand. Pricing should be confirmed by quotation for each order.

MADE USEFUL, NOT JUST MADE

Cut, finished and supplied ready for the next step

A catalogue profile is often only the starting point. Many jobs need a specific length, finish, punched hole pattern, drilled detail, packaging format or supply arrangement.

Mill finish

Extruded aluminium supplied without additional surface treatment, suitable where customers will further process or finish the profile.

Powder coated

Durable colour finish for aluminium profiles. Standard and custom colours can be discussed at quotation stage.

Anodised

Decorative and functional anodised finishes are available for suitable aluminium profiles and applications.

When requesting a quote, include the profile number, description, required quantity, target length, preferred finish, tolerance requirements and delivery location. Photos, sketches or application notes are helpful where the profile needs to fit with another part.

Need a profile adjusted, cut, coated or packed a certain way?

Talk to ALEXCO before ordering so the practical route can be confirmed.
